## **Climate**

The average temperature of the area is 23 °C (73.4 °F).

## **Population**

More than 1,200 lowland people resides in 5 villages.

## **Location**

Moo 8 Huay Kaew Sub-district, Mae On District, Chiang Mai 50130

Tel. 093-146-772-6 Email: tt7014rpf@gmail.com

# Teen Tok Royal Project Development Center

At present, the suitable crops for the local climate and environment are tested in demonstration plots in Teen Tok Royal Project Development Center. When the most suitable ones are found, they will be promoted to local farmer. Vegetable, fruit, coffee and mushroom cultivation is supported under the Food Safety Standard like Good Agricultural Practices (GAP) in order to increase the farmers' sustainable income and improve their livelihood. Furthermore, the center organizes and develops education, society and public health related activities to support the community engagement, strengthen the communities and improve people's lives. The environmental conservation, reforestation project known as "Three Forests, Four Benefits", Vetiver grass growing to reduce soil erosion, chemical use reduction, and environmental contamination monitoring are supported by the center. The center itself is also a learning center on highland agriculture for students, farmers and others who are interested.

## **Main produces of the center**

Kailaan, Baby Pak Choi, passion fruit, Arabica coffee, mushroom, Vanilla, and Phalaenopsis orchid

## **Coffee under the trees creates income and conserve the**

**nature.** The main produce of the Teen Tok Royal Project Development Center is Arabica coffee cultivated under soil and water conservation system. To prevent coffee rust, decrease diseases and pests and conserve the forests, farmers grows coffees and other crops together under the shades of trees or in the abundant forest. The center is also the learning center for Arabica coffee cultivation starting from growing and caring until harvesting high quality parchment coffee turned into royal project products.
